

## ASSIGNMENT-3

NAME: CH POOJA  
REG.NO.: 20BCE7630

### 1). FOR DISPLAYING RECORDS:

```
public class JDBCExample {  
    public static void main(String[] args) {  
        // TODO Auto-generated method stub  
        try {  
            //1, Register the driver  
            Class.forName("com.mysql.jdbc.Driver");  
            //2.establish the connection  
            Connection conn=DriverManager.getConnection("jdbc:mysql://localhost:3306/assignmnet2","root","Bhargavi2003*5##");  
            //3.create a statement  
            Statement stmt=conn.createStatement();  
            //4.execute the query  
            ResultSet rs=stmt.executeQuery("Select * from department");  
            while(rs.next()) {  
                System.out.println(rs.getInt(1)+" "+rs.getInt(2)+" "+rs.getString(3));  
            }  
            //5.close the connection  
            conn.close();  
        }  
        catch(Exception e) {  
        }  
    }  
}
```

### 2.1). PREPARED STATEMENT TO INSERT VALUES FROM USER:

```
package Java;  
import java.sql.Connection;  
import java.sql.DriverManager;  
import java.sql.PreparedStatement;  
import java.sql.Statement;  
import java.sql.ResultSet;  
  
public class JDBCExample {  
  
    public static void main(String[] args) {  
        // TODO Auto-generated method stub  
        try {  
            //1, Register the driver  
            Class.forName("com.mysql.jdbc.Driver");  
            //2.establish the connection  
            Connection  
conn=DriverManager.getConnection("jdbc:mysql://localhost:3306/assignmnet2","root",  
"Bhargavi2003*5##");  
            //3.create a statement  
            PreparedStatement stmt=conn.prepareStatement("insert into  
department values(?,?,?)");  
            stmt.setInt(1, 6);  
            stmt.setInt(2, 50);  
            stmt.setString(3, "CIVIL");  
            //4.execute the query  
            int result=stmt.executeUpdate();  
            System.out.println("result" + result);  
            //5.close the connection  
            conn.close();  
        }  
    }  
}
```

```

    }
    catch(Exception e) {
        e.printStackTrace();
    }
}
}
}

```

## 2.2). INPUT FROM USER USING A SCANNER CLASS:

```

package Java;
import java.sql.Connection;
import java.sql.DriverManager;
import java.sql.PreparedStatement;
import java.sql.Statement;
import java.util.Scanner;
import java.sql.ResultSet;

public class JDBCExample {

    public static void main(String[] args) {
        // TODO Auto-generated method stub
        try {
            //1, Register the driver
            Class.forName("com.mysql.jdbc.Driver");
            //2.establish the connection
            Connection
conn=DriverManager.getConnection("jdbc:mysql://localhost:3306/assignmnet2","root",
"Bhargavi2003*5##");
            //3.create a statement
            PreparedStatement stmt=conn.prepareStatement("insert into
department values(?,?,?)");
            Scanner in=new Scanner(System.in);
            System.out.println("please enter the sno");
            int sno=in.nextInt();
            stmt.setInt(1, sno);

```

```

        System.out.println("please enter dept id");
        int departmentid=in.nextInt();
        stmt.setInt(2, departmentid);
        System.out.println("Please enter dept name");
        String departmentName=in.next();
        stmt.setString(3, departmentName);
        int result=stmt.executeUpdate();
        System.out.println("result " + result);
        //5.close the connection
        conn.close();
    }
    catch(Exception e) {
        e.printStackTrace();
    }
}
}
}
